

§ 245.10

National Airspace System Matters,” outlines DoD/ NORAD responsibilities for the development of plans and policies in concert with the DOT, FAA and USCG for the establishment of a system for identification and emergency security control of air traffic.

§ 245.10 Scope.

This part applies to all U.S. territorial airspace and other airspace over which the FAA has air traffic control jurisdiction by international agreement.

§ 245.11 General description of the ESCAT plan.

The part defines the authorities, responsibilities, and procedures to identify and control air traffic within a specified air defense area during air defense emergencies, defense emergency, or national emergency conditions.

(a) For the purpose of this part, the appropriate military authorities are as follows:

(1) Contiguous 48 U.S. states, including Washington, DC; Alaska; and Canada—Commander NORAD or individual NORAD Region/Sector commanders.

(2) Hawaii, Guam, Wake Island, other U.S. Pacific Territories, and Pacific oceanic airspace over which FAA has air traffic control jurisdiction by international agreement—Commander, U.S. Pacific Command (USPACOM) or designated AADC.

(3) Puerto Rico and U.S. Virgin Islands—Commander, NORAD.

(b) This part provides for security control of both civil and military air traffic. It is intended to meet threat situations such as:

(1) An emergency resulting in the declaration of an Air Defense Emergency by the appropriate military authority. Under this condition, NORAD and USPACOM Commanders have authority to implement ESCAT and may consider executing this part.

(2) An adjacent Combatant Command is under attack and an Air Defense Emergency has not yet been declared. Under these conditions, NORAD and USPACOM Commanders may direct implementation of ESCAT for their own AORs individually, if airspace control measures are warranted and agreed upon by DoD/DHS/DOT.

32 CFR Ch. I (7–1–08 Edition)

(3) Emergency conditions exist that either threaten national security or national interests vital to the U.S., but do not warrant declaration of Defense Emergency or Air Defense Emergency. Under these conditions, NORAD and USPACOM Commanders may direct implementation of ESCAT for their own AORs individually, if airspace control measures are warranted and agreed upon by DoD/DHS/DOT.

§ 245.12 Amplifying instructions.

(a) Prior to any formal ESCAT implementation, the appropriate military authority will consult with DOT through the FAA Administrator and DHS through the TSA Administrator to discuss the air traffic management, airspace and/or security measures required. Every effort will be made to obtain the approval of the Secretary of Defense prior to ESCAT declaration, time and circumstance permitting. Any ESCAT implementation will be passed as soon as possible through the Chairman of the Joint Chiefs of Staff to the Secretary of Defense.

(b) ESCAT may be implemented in phases to facilitate a smooth transition from normal air traffic identification and control procedures to the more restrictive identification and control procedures specific to the situation.

(c) Once ESCAT is implemented, the appropriate military authority will consult regularly with DOT (through the FAA Administrator) and DHS (through the TSA Administrator) as appropriate, regarding any changes in the air traffic management, airspace, and/or security measures required.

(d) Interference with normal air traffic should be minimized.

(e) The process for implementation of measures for mitigation of hostile use of NAVAJD signals, when required, will be subject to separate agreement between DoD and other Departments and Agencies.

(f) Upon the formal declaration of ESCAT, the appropriate military authority has the final authority regarding the extent of measures necessary for successful mission completion.

(g) The rules/procedures governing Special Use Airspace (SUA) will remain
